QCE: 2025 raw result → scaled result at each percentile, General subjects

From QTAC's ATAR Report 2025, Table 6 (subjects with 50 or more students). Read a cell as: the student at this percentile of the subject had this raw result, which scaled to this result.

VET (Table 9): Certificate III 38.0, Certificate IV 51.8, Diploma 58.7. D and E grades are not published.

[ ] The TEA is the best five scaled results out of 500: five General subjects, or four General plus one Applied subject or one completed VET at Certificate III or above; results from 2021 to 2025

[ ] Eligibility: an English subject (English, EAL, Literature, English and Literature Extension, Essential English) at C or better; in 2025, 30,167 of 59,919 students were eligible

[ ] QTAC ranks eligible students by TEA and allocates ATARs to 2,000 bands with a participation model: in 2025 about 37 students per 0.05 band at the top; 7,535 at 90+, 14,758 at 80+, 20,920 at 70+, 25,178 at 60+, 27,764 at 50+

[ ] No TEA-to-ATAR table is published. The calculator reads the TEA as a standing out of 100 on QTAC's scale, places the ineligible students below the eligible ones, and converts the rank among eligible students with the band allocation: an estimate within a few points

Worked example

English 82 (scaled 82.0), Mathematical Methods 86 (94.4), Chemistry 90 (94.0), Physics 88 (91.4), Economics 80 (88.8): TEA 450.5, standing 90.1, about 5,900 eligible students above, ATAR about 92.2. Economics up five raw marks to 85 (92.1) adds 3.4 to the TEA and about half an ATAR point (92.65); the same five marks in English (87, 86.3) add 4.3 and about 0.65 (92.8).

Your plan

My five (or six) subjects and the raw result I would bet on: _____

Scaled result for each, and the TEA (from the calculator): _____

Estimated ATAR now, and the target: _____

The counted subject where five raw marks buys the most: _____

The unit or skill to fix there this term: _____

Next internal assessment and the mark to beat: _____
