

SAT score calculator: raw score to section score (College Board practice tests 4, 5 and 6, averaged)

Count the questions right in each section of a College Board paper practice test (Reading and Writing 66, Math 54), read the section range, add the two lower values and the two upper values for the total range (400 to 1600). The real digital SAT is adaptive (54 and 44 questions) and has no raw score; Bluebook scores it for you.

What a good score is

- [] 1500+: the most selective colleges' middle range; 1450: about the 96th percentile, strong almost everywhere; 1350: about the 90th
- [] 1200: the top quarter, competitive at most state universities; 1029: the 2025 mean; below 1000: under the benchmarks on most splits
- [] Compare with the middle 50% of admitted students at each college (in its Common Data Set), not with the national mean
