From TISC's 2025 Course Statistics Summary (scaled scores for specified percentiles; includes international and mature-age students). The average scaled score across all courses is 60. TISC publishes no conversion from combined marks to scaled scores.

The TEA

[ ] The best four scaled scores, plus 10% of the best Language Other Than English scaled score, plus 10% of Mathematics Methods, plus 10% of Mathematics Specialist; each bonus counts whether or not the course is in the best four; maximum 430

[ ] University competence in English: a scaled score of 50 or more in English, Literature or EALD (met by 73.8%, 86.5% and 62.6% of those students in 2025), or the other routes each university lists

TISC's 2025 TEA/ATAR summary table, published for illustration; the 2026 conversion will differ. 10,265 school leavers received an ATAR in 2025 and 18 received 99.95.

Worked example

English 66, Mathematics Methods 72, Chemistry 70, Physics 68, Human Biology 62: best four 276, plus 10% of Methods 7.2, TEA 283.2, ATAR about 92.9. Adding Mathematics Specialist at 65 as a sixth course changes nothing in the four but adds 6.5 bonus, TEA 289.7, ATAR about 94.1. Human Biology up to 69 displaces nothing (the four are already higher): zero gain, which is the lesson of the best-four rule.

Your plan

My courses and the scaled score I would bet on (or the position in the course): _____

Best four, bonuses and TEA (from the calculator): _____

Estimated ATAR now, and the TEA my target needed in 2025: _____

The course in the four where five scaled points buys the most: _____

The skill to fix there this term: _____

Semester exam date and the mark to beat: _____
